EDUCATION

PES UNIVERSITY

B.TECH IN COMPUTER SCIENCE
2021 – 2025 | 8.06 CGPA

EKYA ITPL

CLASS 11 & 12, PCMC
2019 – 2021 | 88%

RYAN-INTERNATIONAL SCHOOL

CLASS 1 – 10, ICSE
2009 – 2019 | 95.2%

Leetcode: [Sudeev Divakar](#)

SKILLS

CLOUD & INFRASTRUCTURE

AWS • Terraform • Docker
Kubernetes • NGINX • Linux

CI/CD & AUTOMATION

GitHub Actions • Jenkins
Azure DevOps • Bash Scripting

OBSERVABILITY

Grafana • Prometheus • Loki
Tempo • PagerDuty • Zipkin

DISTRIBUTED SYSTEMS

Kafka • RabbitMQ
Resilience4j • Spring Cloud Gateway

LANGUAGES

Python • Java • JavaScript • Bash

FRAMEWORKS & DATABASES

Spring Boot • Node.js • Django
MySQL • MongoDB • Atlas

TESTING

JUnit 5 • Mockito • Postman

CERTIFICATIONS

Web Developer Bootcamp 2024
Python Django — Practical Guide
50 Days of DSA — LeetCode

EXPERIENCE

INFIOS — OMS (KOERBER SUPPLY CHAIN SOFTWARE)

DEVOPS ENGINEER | JUL 2025 – PRESENT

- Provision and manage production-grade AWS infrastructure using Terraform; restructured modules and resolved long-standing reliability issues.
- Build and maintain observability stack (Grafana, Prometheus, Loki) — dashboards, SLI definitions, and alerting for infrastructure and service failures.
- Implemented automated detection and recovery for distributed cache inconsistencies (Hazelcast/Atlas), reducing manual intervention for a critical stateful system.
- Manage deployments across Kubernetes and NGINX using blue-green strategies to minimise downtime during releases.
- Participate in on-call rotations via PagerDuty; lead incident triage and drive post-incident reviews to improve system reliability.

INFIOS — OMS (KOERBER SUPPLY CHAIN SOFTWARE)

DEVOPS ENGINEERING INTERN | JAN 2025 – JUN 2025

- Provisioned AWS environments (EC2, Lambda, MSK) and contributed Terraform modules for environment consistency.
- Wrote Bash scripts to collect application metrics and expose them via Prometheus; worked on Kubernetes deployments and CI/CD pipelines (Jenkins, Azure DevOps).

PES UNIVERSITY TEACHING ASSISTANT — PYTHON FOR PROBLEM SOLVING | SEP 2024 – DEC 2024

- Mentored first-year students in Python debugging and problem-solving; conducted code reviews and reinforced programming fundamentals through lab sessions.

CUVASOL TECHNOLOGIES WEB DEVELOPMENT INTERN | JUN 2024 – AUG 2024

- Integrated Razorpay payment gateway, built responsive UI pages, and visualised interview ratings using D3.js.

PROJECTS

OBSERVABLE MICROSERVICES SHOPPING PLATFORM

- Java 21 / Spring Boot microservices with Kafka event streaming, Keycloak auth, Resilience4j circuit breakers, and Spring Cloud Gateway — containerised with Docker.
- Full observability via Prometheus, Grafana, Loki, and Tempo; test coverage with JUnit 5 and Mockito; API contracts via OpenAPI/Swagger.

MICROSERVICE INVENTORY MANAGEMENT (RABBITMQ)

- Node.js producer routing messages via RabbitMQ to four independent consumer microservices, each performing isolated CRUD operations on MongoDB — containerised with Docker Compose.
- Demonstrates queue-based load levelling and service decoupling patterns applicable to high-volume data pipelines.
